

AS9100 – the ISO Standard for Aerospace, Defence, Security & Space Supply Chain Companies

AS9100 is a widely adopted and standardized quality management system for the aerospace industry and replaces the earlier AS9000 and fully incorporates the entirety of the current version of ISO 9000 while adding additional requirements relating to quality and safety. Major aerospace manufacturers and suppliers worldwide require compliance and/or registration to AS9100 as a condition of doing business with them.

Our 2-day Internal Auditor training course is the ideal way to acquire the skills you need to successfully to maintain and use AS9100 in your company. Our trainer, David Scrimshire is highly experienced and widely travelled having worked in a wide variety of aerospace and manufacturing organisations, both large and small, over many years. He brings a wealth of knowledge and insight. Your staff who attend will gain a solid and detailed understanding of AS9100, and how to leverage the opportunities it brings for Continuous Improvement that will directly impact your company's bottom line.

The aerospace market sector, along with the related sectors of Defence, Security and Space, are enjoying sustained high growth, and it is expected to remain like this for at least the next 5 years. This makes these sectors of great interest, value and opportunity for Irish companies across the island. By getting AS9100 certified, and joining our Network, you will be opening up your company to many opportunities for growth in new business, new products and services and new customers.

AS9100 Internal Auditing Course – no examination (2-day workshop for each location)

Check our events page for details of our next AS9100 training workshops. We run them in Dublin and Belfast usually twice per year. Cost: (per delegate) = £650/€795 (plus VAT) – cost includes Delegate Manual + All training materials

Time: 09:30am - 4:30pm daily
